Windy Yuliana

Perihal : Pengajuan ABSTRAK MAKALAH The 1st **HeSiCon 10th-11th Nov 2020**

Bersama email ini saya attach 2 ABSTRAK makalah saya. Saya sebagai penulis utama. Dengan alamat korespondensi email saya, yaitu : parlinringoringo@ulm.ac.id atau WA: 082130877777 . Seandainya abstrak makalah saya diterima atau ditolak, tolong beritahu lewat WA dan email, terutama WA. Besar harapan saya makalah saya diterima. Saya ucapkan terima kasih.

Hormat saya,

Dr. dr. HARAPAN PARLINDUNGAN RINGORINGO, Sp.A(K)

Bersama email ini saya attach 2 ABSTRAK makalah saya yang berjudul :

- 1. Stevens-Johnson syndrome disebabkan obat anti kejang: laporan kasus dan tinjauan pustaka**
Stevens-Johnson syndrome due to anticonvulsant : a case report and literature review
- 2. Peranan asam ursodeoksikolat dan curcuma pada anak yang menderita Hepatitis A: laporan kasus dan tinjauan pustaka**
The role of ursodeoxycholic acid and Curcuma in children with hepatitis A: case reports and literature review

LETTER OF SUBMITTED ABSTRACT : 14 SEPTEMBER 2020

Subject : Letter of Acceptance

Dear Author(s):

1. **Harapan Parlington Ringoringo** (Department of Child Health, Faculty of Medicine, University of Lambung Mangkurat – RSD Idaman Banjarbaru)
2. Melani Sugiarti Wijaya Kangmartono

Greetings from us,

It is our pleasure to inform you that your paper entitled “**The Role of Ursodeoxycholic Acid and Curcuma in Children with Hepatitis A: Case Reports and Literature Review**” has been accepted to be presented in oral session of **The 1st Health Science International Conference 2020**. You are requested to submit the full paper through “Online Paper Submission” in e-mail: hesicon@ulm.ac.id by November 5th and to guarantee your abstract is include in the seminar program we ask you to complete seminar registration by completing the payment. Please follow the guidelines as mentioned in our website hesicon@ulm.ac.id.

We look forward to having you participate in this coming seminar and present you work.

Sincerely,
The 1st HeSiCon Committee,
Head of Committee

Dr. Eko Suhartono, Drs., M.Si

Hepatitis A is a liver disease caused by the hepatitis A virus (HAV), a self-limiting disease, providing lifelong immunity. The transmission of HAV is fecal-oral. Liver cell damage occurs due to T-lymphocytes-associated immune system. A 9-year-old girl came to the hospital with complaints three days earlier complaining of fever, fluctuation, not chills. The body feels weak, nauseous, have no appetite, eyes look yellow, urine is like tea, normal stool color. The patient has never received hepatitis A immunization. The patient's sclera is jaundice, right upper abdominal pain, no hepatomegaly. Complete blood count within normal limits. AST: 1523 U/L, ALT: 1254 U/L, total bilirubin: 4.33 mg/dl, direct bilirubin: 1.18 mg/dl, indirect bilirubin: 2.15 mg/dl, Anti-HAV IgM reactive. Diagnosis is acute hepatitis A. Treatment is bed rest, low-fat diet, ursodeoxycholic acid therapy, and Curcuma. The patient went home after seven days of treatment in good condition. Ursodeoxycholic acid and Curcuma play a role in the patient's clinical and laboratory improvement. Counseling on personal and environmental hygiene must be frequently communicated to the public and emphasize prevention with active hepatitis A immunization.

Keywords: Hepatitis A, ursodeoxycholic acid, Curcuma, HAV immunization
