**Guideline to extend your paper of the 2018 1st International Conference and Workshop on Telecommunication, Computing, Electrical, Electronics and Control (2018 ICW-TELKOMNIKA) to be published on the TELKOMNIKA, a Scopus indexed journal, SJR Q3**

**\*\*Please pay attention to the details of this email\*\***

#10144 entitled "Vehicle Detection Using Background Subtraction And Clustering Algorithms"

Dear Prof/Dr/Mr/Mrs Yuslena Sari

TELKOMNIKA Telecommunication, Computing, Electronics and Control is a Scopus indexed journal, SJR Q3, and ONLY publishes high quality papers. A high quality paper has:

- (1) a clear statement of the problem the paper is addressing;
- (2) the proposed solution(s); and
- (3) results achieved. It describes clearly what has been done before on the problem, and what is new. The goal of your revised paper is to describe novel technical results.

There are four types of technical results:

1. An algorithm;
2. A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.
3. A performance evaluation: obtained through analyses, simulation or measurements;
4. A theory: consisting of a collection of theorems.

Your revised paper should focus on:

1. Describing the results in sufficient details to establish their validity;
2. Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious;
3. Identifying the significance of the results: what improvements and impact do they suggest.

Second, change title of your paper. The title summarizes the main idea or ideas of your study. A good title contains the fewest possible words needed to adequately describe the content and/or purpose of your research paper. Rarely use abbreviations or acronyms unless they are commonly known. Find the below guide, how to update your paper title.

You have **4 weeks, until October 24, 2018** to revised your paper. Please submit your revised paper by reply this email ([icw.telkomnika@journal.uad.ac.id](mailto:icw.telkomnika@journal.uad.ac.id)), cc: [tole@journal.uad.ac.id](mailto:tole@journal.uad.ac.id). Attach:

1. File Response to Mentor(s) Comments
2. File of your revised paper

**International Conference and Workshop on TELKOMNIKA  
(Telecommunication Computing Electronics and Control) 2018**

September 18-21, 2018 at ROYAL AMBARRUKMO Yogyakarta  
Jl. Laksda Adisucipto No.81, Ambarukmo, Caturtunggal, Depok, Sleman  
Yogyakarta 55281, Indonesia

Dear Prof/Dr/Mr/Mrs,

After doing in depth analysis of your article, we found some mistakes in the writing of the paper that you submitted for conference, entitled " **Vehicle Detection Using Background Subtraction And Clustering Algorithms**" ID #10144. We have addressed the errors in the attached file.

We are also informing some TELKOMNIKA POLICY that you have to pay attention, there are :

1. TELKOMNIKA not accepting single author paper. If your article is written by single author you need to add additional author during the revision.
2. Maximum allowed articles pages are 8 pages. Exceeding the 8 pages will be charged US\$50 for each page.
3. Please revised exactly based on the TELKOMNIKA TEMPLATE. You can download the template in [bit.ly/telkomnika](http://bit.ly/telkomnika).

You can send your revised paper by reply this email. Please immediately repair and send the paper **before August 31, 2018**. You should pay attention to:

**1. Authors should have made substantial contributions to:**

- (a) The conception and design of the study, or acquisition of data, or analysis and interpretation of data
- (b) Drafting the article or revising it critically for important intellectual content

**2. Introduction section**

Explain the context of the study and state the precise objective

An Introduction should contain the following three parts:

- **Background:** Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.

- **The Problem:** If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it.

So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.

- **The Proposed Solution:** Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

**3. Results and Discussion**
