**The final decision of your manuscript depends upon the revised manuscript. The revised manuscript should be submitted for another round of review.**

**Comments for the author(s):**

This paper seems to be good and suitable for publication. However, this paper should be revised as per the comments given below:

1. Abstract of this paper needs to be written more effectively. Use a structured abstract to give a clearer idea of what you do.
2. This paper has many grammatical and typo mistakes which should be corrected in the revised version. Example: There is no space between words in many places as well as grammatical mistakes.
3. Add a minimum of 15 references in the manuscript.
4. Few references are incomplete. All the references should have volume no, issue no, pages, year of publication. Verify all.

**If all the above comments are addressed the manuscript will be a good one and it will make the readers to read the manuscript and it will bring good citation to the manuscript.**

**I recommend reconsidering this manuscript after the revision.**

**Looking forward to receiving your revised manuscript.**
