KEYNOTE SPEAKERS

Keynote Speaker	Name and Institution	Country
Keynote Speaker 1	Prof. Dr. Akihiro Hazama, MD , Fukushima Medical University	Japan
Keynote Speaker 2	Prof. Dr. dr. Mulyanto , University of Mataram	Indonesia
Keynote Speaker 3	Prof. Hyun Jin Park , Korea University	South Korea
Keynote Speaker 4	Prof. Dr. Anil Kumar A , Asian Institute of Technology, Bangkok	Thailand
Keynote Speaker 5	Prof. Yudi Pranoto , Gadjah Mada University	Indonesia
Keynote Speaker 6	Prof. Amin Ismail , University Putra Malaysia,	Malaysia
Keynote Speaker 7	Prof. Dr. Ing. Mitra Djamal , Bandung Institute of Technology	Indonesia

**THE 1ST INTERNATIONAL CONFERENCE ON SCIENCE AND TECHNOLOGY
(THE 1ST ICST UNIVERSITY OF MATARAM
Mataram, Indonesia, November 30th to Desember 3rd, 2016**

TIME	AGENDA				MODERATOR			PIC
Day 1 : Wednesday, November 30 th , 2016								
16.00-18.00	Registration ICST Secretariat, JL. Majapahit 62A Mataram							Organizing Committee
END OF DAY 1								
Day 2 : Thursday, December 1 th , 2016								
08.00-09.00	Registration University of Mataram Dome (Prof Sunarpi Building) JL. Majapahit 62A Mataram							Organizing Committee
09.00-10.00	OPENING CEREMONY Location: University of Mataram Dome (Prof Sunarpi Building) JL. Majapahit 62A Mataram							Drh. Made Sriasih, M.Agr.Sc., Ph.D(MC)
09.00-09.05	Do'a							
09.05-09.10	Indonesia Anthem				Chair: Laily Mardiana,S.SI., M.Si			
09.05-09.10	Welcome Speech				The Chairman of 1 st ICST Dr. Ir. Satrijo Saloko., M.Si			
09.35-10.00	Moming Break Poster Session							Organizing Committee
10.00-11.15	Keynote Speaker Presentation 1 Location: University of Mataram Dome				Moderator: Prof.Surya Hadi , Ph.D			Notulen: Dr. Rahadi Wirawan
10.00-10.35	Keynote Speaker-1 Health				Prof. Dr. Akihiro Hazama, MD Fukushima Medical University, Japan			
10.35-11.15	Keynote Speaker-2 Distribution Of Hepatitis B Virus Genotypes in Indonesia: Implication For Infection Control Measures				Prof. Dr. dr. Mulyanto , University of Mataram, Indonesia			
11.15-11.20	GAP							
11.20-13.05	Keynote Speaker Presentation 2 Location: University of Mataram Dome				Moderator: Prof.Ir.Sri Widyastuti,M.App.Sc.,Ph.D			Notulen: Dr.Satrijo Saloko
11.20-11.55	Keynote Speaker-3 Bioscience and Functional Foods				Prof. Hyun Jin Park, Korea University			
11.55-12.30	Keynote Speaker-4 Nanotechnology				Prof. Dr. Anil Kumar A, AIT Thailand			
12.30-13.05	Keynote Speaker-5 Biopolymer				Prof. Yudi Pranoto , Gadjah Mada University, Indonesia			
13.05-14.00	Break Poster Session							
14.00-16.15	Parallel Session Faculty of Food Technology and Agroindustry, University of Mataram JL. Majapahit 62 Mataram Room 1 to Room 8, Level 3							
14.00-15.00	Room 1 SCIENCE Moderator: Dr.Rahadi W Notulen: Aluh N	Room 2 HEALTH Moderator: Dr. Yunita Sabrina,Ph.D Notulen: Nanda	Room 3 FOOD SCIENCE Moderator Dr. Satrijo S Notulen: Dewi	Room 3 FOOD SCIENCE Moderator: Dr. Bambang HK Notulen : Mursal	Room 5 ANIMAL SCIENCE Moderator: M.Sriasih, Ph.D Notulen:Guyub	Room 6 ENGINEERIN G Moderator: Akmalludin, ST.,Ph.D Notulen:Lili	Room 7 SOCIAL HUMANIORA Moderator: Kamaludin Yusra,Ph.D Notulen:Irfan	Room 8 SCIENCE(MIX) Moderator: Sulaiman ND.,Ph.D Notulen:Nunik

The 1st International Conference on Sciences and Technology
December, 1-2, 2016 Mataram, Lombok-NTB, Indonesia

PREFACE

Bismillaahirrahmaanirrahiim
Assalaamu'alaikum warahmatullaahi wabarakaatuh.

Praise always we pray to God Almighty for giving us the abundance of grace, guidance and inayah, so that we all can met in the “1stInternational Conference on Science and Technology (ICST) 2016”. ICST is a conference where researchers can share and publish their scientific papers about science and technology. The theme of this conference is “Emerging Innovation on Science and Technology for Sustainable Development”.

This conference was done for two days, from 1st to 2nd December 2016, and took place in the Green Campus of the University of Mataram.

We received more than one hundred papers from various universities and research institutions in Indonesia and from overseas, but not all of the papers were published in this proceeding. The paper has been selected and grouped based on the similarity of the research field, which then are presented and discussed. Presentation of the papers will be held in eight parallel classes.

At this moment, the organizing committee would like to expressour gratitude to all of you who have participated this conference, especially to the all keynote speakers, presenters who have submitted posters or orally presented papers and also to the participants. Our special gratitude also goes to the Rector of the University of Mataram who has been highly supporting this conference. Last but not least, the organizing committee would like to thank to all of you who have supported this conference.

Wassalamu'alaikum warohmatullahi wabarakatuh.

Chairman of 1st ICST 2016

Dr. Satrijo Saloko

The 1st International Conference on Sciences and Technology

December, 1-2, 2016 Mataram, Lombok-NTB, Indonesia

OPENING SPEECH - RECTOR THE UNIVERSITY OF MATARAM The 1st International Conference on Science and Technology 2016

Respected Guests,
Keynote speakers,
Conference participants,
and all other participants.

On Behalf of all staffs of the University of Mataram, I welcome you all to Lombok, a beautiful island in West Nusa Tenggara Province, where the University of Mataram is located. Lombok is known for its natural and cultural diversity where you can enjoy traditional cuisines, beaches, waterfalls, mountain, traditional villages and handicraft of many ethnics including Sasak, Samawa, Mbojo, Balinese, Chinese, Arabic, and many others.

As the Rector of the University of Mataram, it is a great honour for me to address the opening of “The 1st International Conference on Science and Technology” here at the University of Mataram, which will be held from 1th to 2nd December 2016, with a theme “Emerging Innovation on Science and Technology for Sustainable Development”. The main aim of this seminar is to gather scientist from all over the world to share their ideas, knowledge and experiences and to build network for possible future collaboration.

As we are aware that sharing knowledge and experiences from speakers are extremely valuable in a conference, therefore I would like to express my high appreciation, first, to the keynote speakers from overseas and from Indonesia for their willingness to come to Lombok to share their acknowledged works. Your effort and contribution to this conference are absolutely valuable. Second, my high appreciation also goes to the national speakers and all other participants, including the speakers from University of Mataram and local universities in West Nusa Tenggara Province, your participation in this conference not only will give incredible share of ideas, skills and knowledge that

The 1st International Conference on Sciences and Technology

December, 1-2, 2016 Mataram, Lombok-NTB, Indonesia

you have, but also will improve the academic environment that we are developing in this university. I hope this conference will be a good forum, not only for communicating and sharing ideas, knowledge and experiences, but also for building networking for future collaboration.

I would also like to take this opportunity to express my appreciation to the sponsors which have given some contribution to this conference. Last but not least, I would like to thank the organizing committee as well as all other supporters and participants, without their effort, commitment and hard work, this conference will not run well.

Finally, I wish you most successful conference, enjoy Lombok Island and hope to see you again in other forum here at the University of Mataram.

Rector of the University of Mataram

Prof. Ir. Sunarpi, Ph.D

TABLE OF CONTENTS

Title	Page
Preface	i
Opening Speech	ii
Table of Contents	iv
<i>Schemata Detection of Chemistry Teachers Prospective Students After Had Exclusive Conceptual Change Experiencing</i> Kurroti A'yun, Suyono	1-4
<i>Use of The Experimental Board on Kirchhoff's Laws to Train Students Skills in Doing Experiment</i> Hikmawati	5-8
<i>Potential of Abalone (Haliotis sp.) as Control Agent of Biofouling (seaweed) in Mariculture with Cage Nets</i> Dewi Nur'aeni Setyowati, Nanda Diniarti	9-12
<i>Growth Performance Of Kappaphycus alvarezii with Addition of Sargassum sp. Extract Using Spraying Technique</i> Tino Feri Ananta, Nunik Cokrowati, Mursal Ghazali	13-20
<i>Development of e-SCM Open Source as Integration of Data Managemen for Fish Farmers SMEs in Pasar Ulekan Bandung</i> Yudi Priyadi, Jurry Hatammimi	21-27
<i>Seasonal Comparison of Aquatic Macroinvertebrate Benthic were Collected in Powerplant Segment Sidutan Stream, North Lombok</i> Nanda Diniarti	28-30
<i>Economic Analysis of Direct Loan Cattle Dispersal System in Sumbawa District</i> Anggi Fitriza and Hermansyah	31-34
<i>Green Synthesis of Bio-degradable Superabsorbent Polymers from Carboxymethyl Cellulose/Humic Acid</i> Nurul Ismillayli, Siti Raudhatul Kamali, Sapriani Hamdiani, Surya Hadi, Dhony Hermanto	35-38
<i>Shear Design of Reinforced Concrete Beam Using Steel Truss Encased in Flexural Plastic Hinge Zone</i> Fatmawati Amir, Iman Satyarno, Djoko Sulistyono	39-43
<i>Design of Seismic Recorder with Single-Axis Geophone for Passive Seismic Monitoring</i> I Wayan Sudiarta, Raja Fathurrahman Akmaludin, Dian Wijaya Kurniawidi, Made Sutha Yadnya	44-48
<i>Study of Livestock Behavior Relationship in Cage Environmental Sanitation Management with Suspect of Scabies Disease</i> Mujahid Fitriadi, Sukardono, Made Sriasih	49-52
<i>Characteristics Of Water Inundation In The Swampland Of Pelabuhan Dalam Village (Ogan Ilir South Sumatera)</i> Puspitahati, Edward Saleh, Robiyanto H. Susanto, Ngudiantoro	53-56
<i>Elements Social Capital in The Vegetable Marketing In Tawangargo Village , Malang Regency, East Java</i> Sugeng Riyanto, Kliwon Hidayat, Keppi Sukesi	57-60
<i>Kinetics of Increasing Protein Content on The Sorghum Flour Fermentation</i> Nur Istianah	61-64
<i>Genes Action in Quantitative Traits of Rice The Result of Crosses Between Ipb 4s Varieties With Red Rice Promising Lines</i> Baiq Ernawati, I Gusti Putu Muliarta Aryana, Anak Agung Ketut Sudharmawan	65-68
<i>Behavior of Rice Market in the Lampung Province</i> Irmayani Noer, Bina Unteawati	69-72
<i>Optode Urease Biosensor and Their Application for The Determination of Hg (II) in Aqueous Solution</i>	73-76

Dhony Hermanto, Mudasir, Dwi Siswanta, Bambang Kuswandi	
<i>Inhibitive Determination of Hg (II) in Aqueous Solution Using a Urease Amperometric Biosensor</i>	77-80
Dhony Hermanto, Mudasir, Dwi Siswanta, Bambang Kuswandi	
<i>Activated Carbon Composites from Rice Husk as an Adsorbent Textile Waste</i>	81-84
Dian W. Kurniawidi, Cici Andayani, Siti Alaa', Susi Rahayu	
<i>Early Detection of Newborn Hearing Impairment: The Useful of Mobile Application</i>	85-89
Hamsu Kadriyan, Sapto Sutardi	
<i>Incorporate Computational Chemistry as an Alternative for Chemistry Laboratory Work at High School Level</i>	90-93
Saprizal Hadisaputra, Lalu Rudyat Telly Savalas, Sapriani Hamdiani	
<i>The Application of Giving Various Dose of NPK Manure Toward Tobacco Crop (Nicotiana Tabaccum L.) in Lombok Island West Nusa Tenggara Island</i>	94-101
Titin Sugianti, Fitria Zulhaedar, Sudjudi	
<i>The Optical Properties of SnO₂ Thin Layer With Dopan Zinc Using Solgel Technique</i>	102-105
Aris Doyan, Susilawati, Yolanita Septiana	
<i>The Electrical Properties of Barium Hexaferrite Nanopowders Using Co-Precipitation Method</i>	106-110
Susilawati, Aris Doyan	
<i>Detection of Lombok Faults using Gravity Methods</i>	111-115
Suhayat Minardi, Teguh Ardianto, Alfina Taurida Alaydrus	
<i>Description of Cognitive Conflict Levels in Chemistry College Students in Conceptual Change Strategy</i>	116-125
Rosalina Eka Permatasari, Suyono	
<i>Preliminary Study And Synthesis Thin Film of Crystalline Al, Zn Co-Doped SnO₂ (Stannic Oxide) With Sol-Gel Dip Coating Technique</i>	126-128
Aris Doyan, Norma Ikraman, Susilawati, Syifa Azzahra, Zahid Ramdhan	
<i>Statistical Downscaling Model Using Nonparametric Regression to Predict Temperature in Selaparang Lombok</i>	129-132
Mustika Hadijati, Desy Komalasari, Nurul Fitriyani	
<i>Preliminary Study and Synthesis Thin Film of Antimony Tin Oxide (ATO) with Sol-Gel Spin Coating Technique</i>	133-136
Syifa Azzahra, Aris Doyan, Susilawati, Ahmad Harjono, Norma Ikraman, Zahid Ramdhan	
<i>The Identification on Iron Compound of Nature Sand in Ampenan Beach Mataram</i>	137-140
Annisa Fithriyani, Husniatul Khair, Susilawati, Aris Doyan	
<i>Preliminary Study of Electrical and Magnetic Properties of Barium MHexaferrites from Nature Sand With Co-Ni Substituted by Co-Precipitation</i>	141-144
Husniatul Khair, Annisa Fithriyani, Susilawati, Kosim, Aris Doyan	
<i>Agro-tourism in North Lombok Stimulates New Crops and Technology Adaptation, and Farming Becomes Profitable</i>	145-149
Taslim Sjah, Zainuri, Ahmad Sauqi, Jayaputra	
<i>Simulation of the Bubble Gas Detection inside the Fluids based on Transmission and Reflection of Ultrasonic Waves</i>	150-156
Firyal Dhiyaul Haqqi, Bakti Abdillah, Rahadi Wirawan, Laili Mardiana	
<i>Development of Data Acquisition System of Moving Object for Landslide Monitoring System</i>	157-160
Rahadi Wirawan, Bakti Abdillah, Wayan Sudiarta, Dian Wijaya Kurniawidi	
<i>Preliminary Study and Synthesis Thin Film Of Fluorine Tin Oxide (Fto) With Sol-Gel Spin Coating Technique</i>	161-164
Zahid Ramdhan, Aris Doyan, Kosim, Susilawati, Syifa Azzahra, Norma Ikraman	
<i>The Livelihood Strategy of Dry Land Farmers in Karang Bayan Village, West Lombok, Indonesia</i>	165-168
I Ketut Budastra, Taslim Syah, IGL. Parta Tanaya, Suparmin, Halil	

<i>Nonparametric Regression Spline in The Estimation of The Average Number of Children Born Alive Per Woman</i> Nurul Fitriyani, I Nyoman Budiantara, Ismaini Zain, Vita Ratnasari	169-172
<i>Development Elements of Industrial Production Increase in Productivity Of Micro / Small (Export Oriented Product) for Enhancing Competitiveness of Industry [Case Study: In Lombok-NTB]</i> I G.A.K Chatur Adhi Wirya Aryadi, I Made Wijana, I Wayan Joniarta	173-176
<i>Study of Maize-Pulses Intercropping on a Dryland</i> I K. D. Jaya, Sudirman, H. Suheri	177-180
<i>The Performance of Production and Price of Rice In South Sumatra</i> Desi Aryani	181-184
<i>Growth Performance of Broiler Chickens Fed Diets Containing Putak and Rice Bran Supplemented With Cellulase, Xylanase, B-Glucanase, Pectinase, Phytase, Protease and Amylase</i> Nalle Catootjie Lusje, Netty Ermawatty, Marlin R. K. Yowi, Defrys R. Tulle	185-190
<i>Growth Performance of Red Rice as Affected by Insertion of Peanut Row between Double and Triple-Rows of Rice in Aerobic System on Raised-Beds</i> Nihla Farida, Hanafi Abdurrachman, V.F. Aris Budiarto, Wayan Wangiyana	191-196
<i>Improving Growth and Bulb Production of Several Varieties of Shallot through Mycorrhiza Inoculation and Growing Peanut Plants Inserted between Double-Rows of Shallot (Allium ascalonicum L.)</i> Wayan Wangiyana, I Komang Damar Jaya, I Gde Ekaputra Gunartha, Sunarpi	197-201
<i>Skill of Warige as A Seasonal Climate Forecast in Lombok, Indonesia</i> Ismail Yasin, Mahrup, Mansur Ma'shum, Sukartono, Husni Idris	202-206
<i>Simple Solar Desalination for Seawater at Kec. Bayan Kab. Lombok Utara</i> Dhony Hermanto, Nurul Ismillayli, Siti Raudhatul Kamali, Fahrurazi	207-210
<i>Production of Lentinula edodes (Shiitake mushrooms) on inoculated logs of a range of tree species</i> Irwan Mahakam Lesmono Aji	210-215
<i>Shear Analysis And Design of Reinforced Concrete Interior Beam Column Joint Using King Cross Steel Profile</i> Rahmani Kadarningsih, Iman Satyarno, Muslikh, Andreas Triwiyonono	216-219
<i>Polytomous Logistic Regression in Analyzing the Presence of National Pilot Mosque in Karang Baru Mataram, 2016</i> Nurul Fitriyani, Lailia Awalushaumi, Agus Kurnia	220-223
<i>Shear Capacity Of Hybrid Coupling Beam</i> Nursiah Chairunnisa, Iman Satyarno, Muslikh, Akhmad Aminullah	223-227
<i>The Modification and Analyzing of heat Loss of The Heater System in The Knockdown Fumigator Type</i> M. Munandar Prayuda, Sukmawaty, Guyup Mahardhian D.P.	228-233
<i>Design of Seismic Recorder with Single-Axis Geophone for Passive Seismic Monitoring</i> I Wayan Sudiarta, Raja Fathurrahman Akmaludin, Dian Wijaya Kurniawidi, Made Sutha Yadnya	234-238
<i>Zinc Supply and Root Pruning on Growth and Relative Zinc Absorption Rate by Transplanted Rice (Oryza sativa L.)</i> Mulyati	239-246
<i>Making Learning Media of Statistical Physics Course Using The Internet Offline Browser for Physics Students in PMIPA FKIP of Mataram University</i> Muhammad Taufik, Aris Doyan, Susilawati, Gunawan	247-250
<i>Potential for Mass Rearing of the Egg Parasitoids, Ooencyrtus malayensis and Hadronotus leptocorisae (Hymenoptera: Scelionidae) on Nezara viridula Eggs</i> Aisah Jamili, Yen Kusnita	251-254
<i>Factors Related to Stunting in Children Aged 24-59 Months in Narmada Public Health Care</i>	255-259

Lina Nurbaiti, IDGN Agung, Umara Lani Anika, Arina Windri Rivarti, Dimas Pambudi Prakoso, Nabila Fawzia Putri, Nanda Retno Wardhani, Agus Gowinda Amijaya, Andri Irfan

Abstract

Coupled shear-wall structures are commonly applied for intermediate and high rise building to provide the withstand of lateral loading caused by an earthquake and wind loading. The failure mechanism of coupling beams affect the behaviour of coupled shear wall system because coupling beams are normally imposed to high shear stresses. The use of steel truss in coupling beam is considered as a new alternative method of coupling beam, solution to the problem for enhancing shear strength in coupling beam. The use of steel truss coupling beam encased in reinforced mortar can restrain the shear behaviour of coupling beam. This paper presents the analytical analysis shear design of various type of coupling beams including diagonal reinforced concrete coupling beam, steel truss coupling beam with and without buckling consideration and hybrid coupling beam that using steel truss encased in reinforced mortar. All type of coupling beams will be designed with the scale of 1:2.5 and span to depth ratio of model is 1.78 that requires for diagonal bars according to SNI 2847:2013 as the building code requirements for structural concrete under seismic design in Indonesia

Keywords: *coupled shear-wall, coupling beam, steel truss, reinforced mortar*

1. Introduction

SNI-2847:2013 Building Code Requirements for Structural Concrete [1] is the guideline for seismic design in Indonesia. This code requires the use of diagonal reinforcement for coupling beams having span-to-depth ratios lower than two. Moreover, The experimental test of [2] described that diagonal arrangement of reinforcement for coupling beam present sufficient resistance of shear strength for deep coupling beam with small span-to-depth ratios. Unfortunately, the applying diagonal reinforcement is difficult to construct on site. The utilizing steel truss reinforcement is considered as the alternatives method of coupling beam with encased in reinforced mortar for substituting the diagonal bars of coupling beam. This paper describes analytical analysis for various type of coupling beam using steel truss and encased mortar including diagonal reinforced concrete coupling beam.

2. Design of coupling beams

To asses the shear capacity of coupling beams, 10-stories building and span-to-depth ratio for coupling beam less than two for each level was chosen as a prototype coupled shear wall structure that adopted from [3] Assumed member sizes of structure are shown in Table 1 and 8th level was chosen as a model for experimental phase.

Table 1. Geometry and Shear forces of Prototype Structures of Coupled Shear wall [3] and [4]

No	Level	Width (b)	Depth (h)	Shear force (kN)		Material Properties
				[3]	[4]	
1	8	300	800	456	422.07	Beam reinf $f_y = 275$ MPa
2	7	350	800	592	555.03	
3	6	350	800	644	609.57	Hoop/tie reinf $f_y = 275$ MPa
4	5	350	800	676	647.37	Concrete $f_c = 30$ MPa
5	4	350	800	669	643.16	(above level 3) $f_c = 25$ MPa
6	3	350	800	592	550.56	
7	2	350	1500	908	1212.17	

The target shear capacity for all models of coupling beams are taken as 422.07 kN was adopted from previous researchers [4] as a prototype structures and all type of coupling beams will be created with the scale of 1:2.5. Design procedures for these models based on SNI 2847:2013 [1] and are basically based on a simple truss analogy for steel truss and hybrid coupling beam [4]. The dimension of coupling beams models is 120 mm x 225 mm with length of beam is 400 mm. Span-to-depth ratio of models is 1.78 and V_u exceeding $0.33\lambda\sqrt{f_c}A_{cw}$. The target of cylindrical compressive strength is 25 MPa.

3. Diagonal reinforced concrete coupling beam.

Shear capacity of diagonal reinforced concrete coupling beam is provided by concrete transversal and diagonal reinforcements contribution. This model can be shown in Fig.1

Fig.1. Model of diagonal coupling beam (a) configuration of diagonal bars

$$V_{total} = V_c + V_s + V_{diagonal} \quad (1)$$

Transversal bars shall be distributed along coupling beam with total area not less than $0.002b_w s$. So, the next step is to calculate the required area of diagonal bars according to Eq. 2. Each groups of diagonal bars have to comprise with four reinforcements.

$$V_n = 2A_{vd} f_y \sin \alpha \leq 0.83\sqrt{f_c} A_{cw} \quad (2)$$

where α is the angle between the diagonal reinforcement and longitudinal axis of coupling beam.

Diagonal bars should be encased by transverse reinforcement with outer dimension not less than $b_w/2$ in direction parallel with b_w and $b_w/5$ for other sides.

4. Steel truss coupling beam

The use of steel truss coupling beam is considered as an new alternative method of coupling beam, solution to the problem for enhancing shear strength in coupling beam. In this study, the steel truss coupling beams consist of double angle steel and angle steel profiles. The diagonal force component (F_d) and the shear resistance of steel truss can be obtained by Eq.3.

$$F_D = A_s f_y \text{ and } V_{steeltruss} = 2F_D \sin \alpha \quad (3)$$

Model 3 can be defined as model 2 with buckling consideration design. In this model, diagonal and longitudinal members have to fulfill buckling requirement according to SNI 1729:2015 [5] as Spesification for Structural Steel Building as the guideline in Indonesia that can be enclosed as Eq. 4 and Eq.5

$$\text{If } \frac{Kl}{r} \leq 4.71 \sqrt{\frac{E}{f_y}} \text{ or } \frac{f_y}{F_e} \leq 2.25 \text{ and } F_e = \frac{\pi^2 E}{\left(\frac{kl}{r}\right)^2} \text{ with } F_{cr} = \left[0.658 \frac{f_y}{F_e} \right] \quad (4)$$

and

$$\frac{Kl}{r} > 4.71 \sqrt{\frac{E}{f_y}} \text{ or } \frac{f_y}{F_e} > 2.25 \text{ with } F_{cr} = 0.877 F_e \quad (5)$$

The total capacity of diagonal members and shear capacity in model 3 is calculated by Eq.6

$$F_{D(model3)} = A_s F_{cr} \text{ and } V_{steeltruss} = 2F_{D(model3)} \sin \alpha \quad (6)$$

5. Hybrid coupling beam

Hybrid coupling beam is model 4 that can be defined as steel truss coupling beam encased in reinforced mortar. The utilizing of encased reinforced mortar in steel truss is to prohibit premature buckling and enhance the shear capacity of coupling beam. The shear resistance of this model is provided by steel truss and reinforced mortar. The design procedural this model similar with steel truss coupling beam in model 2. Additionally, design of reinforced mortar can be designed as ordinary reinforced concrete beam. The total shear resistance provided by hybrid steel truss as model 4 is calculated by Eq. 7

$$V_{total} = V_{mortar} + V_s + V_{steeltruss} \quad (7)$$

The shear capacity and the geometric dimension of those type of coupling beams models are tabulated in Table 2 and Table 3.

Table 2. Shear capacity of various arrangement reinforcement of coupling beams

No	Type of coupling beams	Vc / Vmortar (kN)	Vs (kN)	Vd (kN)	Vtotal (kN)
1	Diagonal reinforcement	20.10	21.08	32.99	74.17
2	Steel truss without buckling consideration	-	-	68.23	68.23
3	Steel truss with buckling consideration	-	-	88.64	88.64
4	Hybrid steel truss	18.58	20.93	59.49	98.99

Table 3. Geometry dimension of design various type of coupling beam models

Diagonal reinforced coupling beam	Steel truss coupling beam without buckling consideration		Steel truss coupling beam with buckling consideration		Hybrid coupling beams			
	Horizontal Element	Diagonal Element	Horizontal Element	Diagonal Element	Horizontal Element	Diagonal Element	Reinforced mortar with f_c' mortar=30Mpa	
Diagonal bars	Double Angle Steel	Angle steel	Double Angle Steel	Angle steel	Double Angle Steel	Angle steel	Longitudinal Bars	Transverse Bars
4 ϕ 6	2L 30.30.3	L.30.3 0.3	2L35.3 5.3	L35.3 5.3	2L 30.30.3	L.30.3 0.3	2 ϕ 6	ϕ 6-200

Geometry sketch of test specimens and reinforcement details are shown in Fig. 2.
