Novitasari Novitasari:

We have reached a decision regarding your submission to Timor-Leste Journal of Engineering and Science, "A study of the ablution wastewater conservation at Al Baythar Mosque in the Banjarbaru city, Indonesia".

Our decision is: Revisions Required

Edio da Costa
ediocosta@tljes.org

Reviewer A:
Recommendation: Revisions Required

Does the title of the article short, clear, and reflect the overall content?

The Title is clear and reflect the overall content

Does the abstract of the articles clearly summarise the overall content of the research?

Abstract clearly but still need to improve the language

Does the article provide scientific and practical justification of the research?

Need to adding some justification from previous research related to application of Infiltration well from outside and inside Banjarbaru.

Does the article formulate clear problem statement and objectives of the research?

The problem statement and objectives are clear

Does the article adequately and soundly provide and review relevant literatures, conceptual frameworks and hypotesis?

Review relevant literatures is adequately

Does the article clearly outline research method, and data collection techniques?

The research method is still not provide the data source, data collection in Laboratory and direct measurement, Formula to explain the Ablution waste water discharge

Can You easily identify the manuscript statement?

Yes it is easy to identify the manuscript statement

Does the article present results and discussions according to the objectives of the research?

The discussion is too short and not fully explain of the Result. Need to adding some Discussion to interpreted result of Rainfall intensity, Design discharge, Ablution wastewater discharge which is relation to the Infiltration well that can increase the quantity of pump well water.

Does the article provide sound conclusions and implications of the research findings?

It is need to adding the implication base on the research finding

Does the article state its research limitation?

It is need to provide research limitation to complete by others researcher in the future

What is the greatest strength of this piece of writing?

The article have strength in the relation with solve the problem of water conservation.

Does the distracting grammar, punctuation, spelling, or word usage problems?

Good with grammar, Punctuation, Spelling

Only repair the numbering per section and consistent with the font and paragraph alignment

Does the article provide sound conclusions and implications of the research findings?

Still need to adding the implication

Does the article provide good source of quotations and bibliography?

Yes it is.
