Dear Ismi Rajiani & Paula Pyplacz

Please find attached the Similarity Report prepared by Cross Check - the one of the most popular antiplagiarism system in the world dedicated for editors and publishers. In your case the similarity index is 30%. The similarity index according to the standard requirements should be up to 10%. If your index exceeds this figure, it means you have to make changes in your article in 30 upcoming days.

Please be careful, as the Cross Check checks not only the exact phrases taken from other publications, but also sentences with are similar (paraphrased sentences). So it means it some cases you can see the single words or phrases underlined. It means that the system detected that this sentence is too similar with the original source and also should be changes.

Please notice that you can see the summary report only (the PDF attachment), but the Editorial Board can see the original sources also in the system, so take care of your article while revising.

Please notice that we follow international standards for publishing against dishonestly, this means that after the second report for the revised article we as the Editorial Board should inform your university that the plagiarism was detected, if the text will not be prepared according to the required standards. Thank you for your understanding.

Best regards,
Secretariat of PJMS
