Hello, dear Rudi Siswanto

In order to evaluate your paper entitled " MODELING ANALYSIS OF THE LONG EFFECT OF THE MAIN ROLL-HOOP LENGTH ON THE STRENGTH OF FORMULA STUDENT CHASIS ", the actions listed below are requested. After that, please resubmit your paper for a second round of review.

Reviewer Responses:

- English is comprehensible but needs correction of grammatical errors and style. We would like to suggest using our service "English Language Editing".
- The English language should be adopted also for the references, even if the original documents are in other languages.
- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
- The legend in some figures is unreadable; please check.
- In the Conclusion paragraph the Authors could propose further improvements to be set for their proposal for a future development.
- The references should be extended to have a deep state of art with the newest titles (2016-to date).
- The literature review needs to be expanded to the threshold of two journal pages
- The quality of Figures 4,6 should be improved

Please provide an edited version of the article **by 04.03.2019**.

We are in touch 20/6.

with respect, general manager
