**SUMMARY**

Jackfruit (*Artocarpus heterophyllus* L.) is one of the most widely cultivated fruit in Indonesia. The present study was carried out during 2011 and 2012 on the jackfruit germplasm planted at Forestry and Plantation area of Gunungkidul Regency, Yogyakarta Province, Indonesia. The germplasm has a large collection of jackfruit accessions belongs to 11 different origins i.e., East Java, Central Java, West Java, Bali, Medan, Pekanbaru, Lampung, East Kalimantan, South Kalimantan, Kendari, and Lombok. The study aimed to assess the variation of jackfruit accessions based on morphological characters. Overall, the 71 morphological characters were used for scoring and standardization of the jackfruit land races. Results revealed that jackfruit accessions belongs to eleven different provenances were

The *SABRAO Journal of Breeding and Genetics* has received the article titled: "GENETIC DIVERSITY OF JACKFRUIT (*ARTOCARPUS HETEROPHYLLUS* LAMK.) GERMPASM BASED ON MORPHOLOGICAL PARAMETERS"

Dear Colleague

I hope you will be safe and healthy in the current unexpected situation, please.

In view of your expertise on the subject, I would like to ask you to kindly review this article within TWO WEEKS, please.

I also hope that you can use the "text track changes" for working on the manuscript and that option is more helpful in improving the manuscript, please.

However, in addition, I have also attached the Reviewer's Guide for assessing the suitability of the manuscript and recording the comments.

**I would also be grateful if you could kindly confirm receipt of this email.**

I look forward to your kind reply, please.

Best wishes

SABRAO MS-21-24 (Reviewing SABRAO J. Breed. Genet.) Kotak Masuk x

Sincerely
