Dear Editor,

I am writing to submit our manuscript entitled, "**Comparison of Maximum Likelihood and Support Vector Machine Classifiers For Land Use/Land Cover Mapping Using Multitemporal Imagery**," for consideration for publication in Academic Research Internasional-ARInt. Because our findings could be applied and increased the accuracy of land use/land cover maps, they are likely to be of great interest to the vision scientists, researchers, and lecturers in the remote sensing community and others who read your journal. This manuscript describes original work and is not under consideration by any other journal. All authors approved the manuscript and this submission.

I beg and sincerely hope that this article can be received as soon as possible, if possible in June this year, because I use this article as a graduation requirement for the Doctoral Program. Thank you for receiving our manuscript and considering it for review. We appreciate your time and look forward to your response.

Kind regards,
