**Reviewer- A****Decision: Major revisions required**

Evaluating Legal Frameworks for Cybercrime in Indonesian Public Administration: An Interdisciplinary Approach is a study on cybercrime and the legal frameworks in Indonesia aimed at controlling and addressing this issue. Here is a review of the paper.

1. The abstract clearly states the objective of the study, which is to evaluate the legal frameworks and articles related to cybercrime in the Indonesian public administration. It should also provide a brief context by mentioning the rise of cybercrime and its negative consequences.
2. The manuscript should explain various aspects, including the global nature of cybercrime, the importance of legislation in combating cybercrime, and the specific regulations and administrative laws in Indonesia to address cybercrimes.
3. The paper should highlight the study's theoretical significance by addressing the academic contribution of examining cybercrime issues in multiple countries. It should also emphasize the practical importance of the research by mentioning the need for law-making authorities and policymakers to improve the implementation of cybercrime laws.
4. The paper briefly mentions a qualitative descriptive approach, an empirical judicial technique, and the statute approach analysis method as the study's methodology. However, providing more details on how these methods were applied and the data sources used would be helpful.
5. While the paper mentions the study's findings regarding the Indonesian legislative body's laws on cybercrime, it does not provide any specific details or insights into those findings. Adding key points from the findings would make the paper more informative.

---

**Reviewer -B****Decision: Major revisions required**

The study effectively introduces the topic of cybercrime and the legal frameworks in Indonesia. It establishes the significance of the study and its implications while providing a general overview of the study's scope. To improve the paper, here are some suggestions.

1. The literature review provides an overview of the legal frameworks and legislation related to cybercrime , specifically focusing on Indonesia. It should also discuss the global evaluation of cybercrime laws and the role of law enforcement agencies in implementing legal sanctions.
2. The paper must cover various perspectives from different regions, including Europe, Africa, South Asia, and the United Arab Emirates. The authors should also mention the global initiatives, such as the United Nations cybercrime treaty, and their impact on cybercrime investigation and prosecution.
3. The methodology section describes the qualitative approach used in the study, including the data collection from primary and secondary sources . However , it must mention the use of relevant journals and databases for data analysis.
4. In the results and discussion section , the review focuses on Indonesia's legal frameworks for cybercrime . It must provide a detailed analysis of the articles and sections of Indonesian law that pertain to cybercrimes and their associated penalties . This section must emphasize the need for robust legislative structures and highlight the challenges and vulnerabilities in the Indonesian cyber law enforcement system.
5. The paper presents information and recommendations without offering a critical analysis of the existing legal frameworks. It would be beneficial to include a more balanced evaluation of the strengths and weaknesses of the current system, addressing any limitations or gaps in the legal measures.

## Response to Reviewers

Sr. No.	Reviewer's Comment	Response
	Additional to previous revisions, by addressing these areas, this paper can provide a more comprehensive analysis of the topic and offer valuable insights to readers.	Thankyou respected reviewer. I am highly grateful for all valuable comments and suggestions.
1	The study mentions statistics and references to support its claims, but it lacks specific details and proper citations. Including specific sources and providing more evidence would strengthen the arguments and enhance the credibility of the analysis.	Thankyou, dear review. Done as suggested by your kind self throughout the paper.
2	The text focuses solely on the legal frameworks and cybercrime situation in Indonesia. While this is a valid and important topic, it could be further enhanced by incorporating comparative studies or exploring cybercrime laws in other countries. This would provide a broader perspective and enable readers to understand the context of cybercrime legislation beyond a single country.	Dear reviewer, Thank you for your kind suggestions. Done as suggested by your kind self.  Please see pages 11-18

3	<p>The text acknowledges the use of qualitative data collection as a limitation. It would be beneficial to elaborate on why this method was chosen and discuss potential biases or limitations associated with it. Additionally, discussing potential future research directions that could address these limitations would provide valuable insights.</p>	<p>Dear reviewer. Thank you for your kind suggestions. Done as per suggestion.</p> <p>Please see pages 20-21</p>
