Tulang Servikal

Cedera tulang servikal

Karakteristik

- Cedera servikal sering terjadi akibat trauma langsung atau tidak langsung dan merupakan penyebab kematian yang tinggi.
- Cedera servikal dapat terjadi pada semua tingkat servikal dan biasanya terdapat pada orang tua karena osteoporosis dan osteoarthritis.
- Pada cedera servikal, gambaran foto konvulsional dapat menunjukkan diagnosis dan tidak menunjukkan pergeseran pada vertebrae servikal. Cedera servikal servikal perlu dilakukan dengan teknik pergeseran ortopedik.
- Teknik yang terapan pada orang tua dengan osteoporosis servikal adalah teknik kompresi servikal (MOC), sedangkan teknik pergeseran servikal dilakukan dengan teknik pergeseran ortopedik.
