The image shows a screenshot of a PDF document titled "Exploration and characterization of locals durian in two subdistricts of Malang East Java Indonesia". The document is displayed in a viewer window, with the title and abstract visible. The abstract text is as follows:

ABSTRACT

Durian production centers in East Java areas are quite numerous, two of which are Kasembon and Ngantang Subdistricts, Malang District. In these areas, most durian trees are propagated from seeds. This investigation aimed to determine the genetic diversity by exploration and characterization of superior types in the Kasembon and Ngantang Subdistricts. The research was conducted by a descriptive method. Determination of samples in the study using a non-probability sampling design with a purposive sampling method. The research was conducted by characterizing the qualitative and quantitative morphological characters from fruit, leaves, and trees. The characters identified are 81 characters. Every important durian part such as fruit, leaves, and trees is documented using a digital camera. The results of the research showed that local superior durians from Kasembon and Ngantang Subdistrict had diverse characteristics. This diversity is in the character of fruits, leaves, and trees. The genetic distance between durians is 0.109–0.343.

KEYWORDS: Characteristic, durian, local, morphology.

INTRODUCTION

Over the last decade, there has been a significant increase in the production, marketing,

Dear colleague Dr. Mursyidin,
The editorial board of the Journal of Agricultural Science and Technology would appreciate your opinion as a referee concerning the publication of the enclosed manuscript entitled:
"Exploration and characterization of locals durian in two subdistricts of Malang East Java Indonesia" J. 67423-1401
I would appreciate if you could kindly give your comments on the manuscript regarding the structure, findings (figures & tables) and interpretations, and return it with the completed evaluation form within the **next six weeks**. In case, if it is not possible for you to review the manuscript, please send it back at your earliest convenience.

Sincerely Yours,
K. Poustini, Ph. D.
Editor-in-Chief

EVALUATION FORM

Code No. J. 67423-1401
 Title of manuscript:
"Exploration and characterization of locals durian in two subdistricts of Malang East Java Indonesia" J. 67423-1401

Recommendations:

- The manuscript is suitable for publication
- The manuscript is suitable for publication after revisions. minor revisions major revisions
- The manuscript is not suitable for publication

Remarks:

1. The coverage of this study is too narrow, with only two subdistricts in Malang. Even Malang alone is a regency with a large area and has many subdistricts, more than 30.
2. The data presented is more than two years old, so it does not meet the criteria of this journal. In addition, the presentation of data is less attractive, and the depth of discussion is also lacking, making it less attractive to broader (international) audiences.

Novelties:

Is the paper new, original and valuable contribution to merit publication in an international journal? Please rate on the scale given:

10 9 8 7 6 5 4 3 2 1 0
 Highly interested Not interested

3 2 1 0

Discussion:

Are the interpretations and conclusions sound and justified by the data?

10 9 8 7 6 5 4 3 2 1 0
 Reasonable conclusions, justified from data conclusions not justified at all

Journal of Agricultural Science and Technology is one of the TMU Press journals that is published by the responsibility of its Editor-in-Chief and Editorial Board in the determined scopes. Journal of Agricultural Science and Technology (JAST) is an international research journal published bimonthly for the purpose of advancing the scientific studies. The subjects covered by JAST include all aspects of agriculture and natural resources (see Areas Covered). The journal will consider submissions from all over the world, on research works not being published or submitted for publication towards publication as full paper, review article and research note. The Papers are published in English with an extra abstract in Persian.
Important note: The total word count should be 4500 words in 20 pages for a manuscript (includes table
