Dear Authors,

Thanks for your kind contribution. We have reviewers' comments on your paper (attached). Please send the revised paper within 2 weeks of receiving this email. Please send responses to reviewers by authors in separate files. An example of a "response to reviewers by authors" is attached. Please use the following link:

Revised Paper Submission Link:

<https://form.jotform.com/geomate/journal-revised-paper>*****Notes for your revision:**

- Besides revising the contents, authors are required to check all formats of the manuscript and make sure that they conform to the formats given in the paper template.
- Make sure that all cited references in the text are given in the reference list. Uncited references should not be given in the list.
- In case your manuscript has been accepted without detailed comments from reviewers, authors are also required to check the formats carefully and resubmit the manuscript.
- The citations inside the introduction and throughout the paper must be in ascending order. Please rearrange the list of references and cite them inside the text in ascending order.
- Please include relevant references from the GEOMATE journal to assist readers of this journal in connecting to the paper. Refer to some recent and up-to-date research papers, especially 2021 and 2022.
- Please add a (last) paragraph in the introduction in which the content of the subsequent sections of the article is described.
- Response to reviewers' file: Do not send the old version. You must include all the comments given by the reviewers and our editorial team. Please include all the comments in response to the reviewers' file from the beginning until now in one file.

Best regards.

- Keywords: One line space above and below.

- Fig.1 Four photos renamed Fig.1a, 1b, 1c, 1d. Then, could you explain each?

-Subsection 3.1 One line space above and below. Follow this style for all.

-Fig.3: Paper formatting problem:

If a table/Fig is over two columns on each page, please do not put it in the middle/inside the text. In that case, on each page, the tables/figures should be put at the bottom of each page to avoid section breaks on each page. All the text on one page should be arranged on the left column, and it will continue to the second column.

- Page 4, column 2: Spaces in the pages – Fill all the pages with text and figures appropriately. Avoid spaces at the bottom or top of each page.

-Fig.5. The Scale bar showing on each figure is missing. See the sample in the attached file.

- Fig.6: Make all the font sizes 10 (in and out of the figure). Clear font, please.

I use the free paint, which usually comes with windows. You can use any photo editor or paint.

Please do not compress the figure (images of 600 dpi resolution or more are preferable). Draw figures clearly and embed text in the image properly. Do not cut and paste from another text and ensure the pictures look useful and readable after printing. Do not use outer boundaries. Figures should be auto-fit to a single column or the width over two columns. Font size in all figures must be 10 font sizes in Times New Roman or similar (Not too big and not too small). Do not use outer borders, italics, and bold. One good example and 4 bad examples have been given in the template for your reference. Please follow all the instructions strictly.

- Fig.7 Two photos renamed Fig.1a, 1b. Then, could you explain each?

- Page 7, column 1: Spaces in the pages – Fill all the pages with text and figures

- Section 6. One line space above.

-References: pp.??-?? missing in many references. Follow the template referencing style.

et al is not allowed. Provide all authors' names. Do not use another language (It must be an English translation of other languages). No italics, no all capital. Use the full name of the journal.

- Others-

- Besides revising the contents, authors must check all manuscript formats and ensure that they conform to the formats given in the paper template. Please see the sample papers on the journal website.

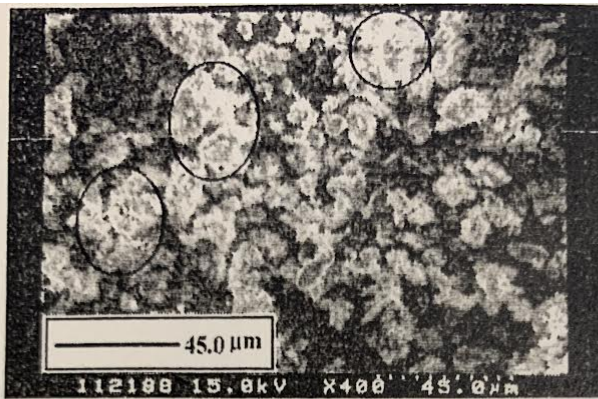

- Please ensure all cited references in the text are given in the reference list. Uncited references should not be given in the list.

- Besides the above corrections, the authors must check again and again, line by line and word by word, throughout the paper. The template and sample papers are attached for your reference.

- Response to reviewers' file: Do not send the old version. You must include all the comments from the reviewers and the editorial team. Please include all the comments in response to the reviewers' file from the beginning until now in one file.
