Comments from the Editors and Reviewers:

Reviewer #2: In the abstract, last statement of the conclusion should be in further tense since you are given a recommendation.

Conclusion: O3FAs as a complementary treatment provided advantages for CRC patients, while further analysis involving up-to-date studies and a wider range of parameters WILL BE required to enhance the understanding of the potential benefits.

Comments from the Editors and Reviewers:

Reviewer #2: In the abstract, last statement of the conclusion should be in further tense since you are given a recommendation.
Conclusion: O3FAs as a complementary treatment provided advantages for CRC patients, while further analysis involving up-to-date studies and a wider range of parameters WILL BE required to enhance the understanding of the potential benefits.
