2. Tujuan penelitian pada bagian Pendahuluan sebaiknya dituliskan dalam bentuk narasi, bukan poin-poin.

Dear The Editor in Chief of The Jurnal Ilmu Lingkungan.

I would like to let you know that I have been working on my paper to improve and fix it in the way reviewers comment and suggest and I have resubmitted as well. Hopefully, it will meet the requirements of your journal. However, several things that would not really fit the comments of the reviewer will be:

1. The Part of references that belong to the calculations way, in this case, is Hargreaves, 1994, which stated the number of values of solar radiation (RA)-regarding its strong relation to evapotranspiration formula- remains in this manuscript. I hope my decision can be accepted.
2. The last comment about notifying me how I am writing has been deriving me from scrutinizing my work. However, if you still find a mistaken affix anywhere, please let me know, so I can amend it immediately.

That is all my work to really improve my paper so that it can be deserved to be published in your journal. I am attaching the explanation draft about things I have been doing in my revision works. Please let me know if there is anything I should still do about it. I am looking forward to hearing from you.

Sincerely yours,

Nilna Amal

Dear The editor of The Jurnal Ilmu Lingkungan Undip
Dr. Budi Warsito

I have been rereading and trying my best to find anything that can make the journal not seem not good. Alhamdulillah, so far, I have only seen two very minor problems, which are the absence of the letter (b) for Figure 3 and the absence of the word "Hargreaves" in lines 2-3 in Kesimpulan. Hopefully, my comments are clear enough so that you can make a correction. Please let me know if there is anything I can do further.
I am looking forward to hearing from you.

Sincerely,

Nilna Amal

Note: I am adding an attachment to this email as an additional explanation about what I have done so far.
