Dear Editor:

I wish to submit an original research article entitled "**System thinking for policy modeling fits youth's unwillingness as paddy farmers**" for consideration by the *International Journal of Biosciences (IJB)*

I confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere. We have approved the manuscript and agree with submission to the *International Journal of Biosciences (IJB)*. There are no conflicts of interest to declare.

Indications the occurrence of aging farmers indicate that the problem of farmer regeneration, particularly paddy farmers, requires a comprehensive system capable of resolving lengthy and complex issues. Efforts to reverse aging through farmer regeneration are strange and time-consuming. Thus, System Thinking must be applied to determine the root cause of the issue and the critical nature of involving all parties or subsystems, including the sustainability of the wetland environment through the use of native wisdom with the Causal Loop Diagram. This diagram could be used to make policy models for the younger generation interested in working as paddy farmers.

I beg and sincerely hope that this article would be received as soon as possible, by July 2022, because I use this article as one of the requirements for graduation from the Doctoral Program. Thank you for receiving our manuscript and considering it for review. We value your time and look forward to hearing from you at your earliest convenience.

Sincerely,
