Reviewer A

This manuscript is not good. 1. The introduction does not reflect the importance of research 2. The experimental design is very unclear, 3. The statistical analysis is incorrect. 4. Does not explain how to quantify histological analysis. 5. Explanation of the results of research is confusing 6. Discussion is not based on statistical analysis

Recommendation: Decline Submission

Reviewer H

1- The language of the research needs to correct
2- I am not found any statically analysis in research
3- Some scientific name did not write correctly
4- Some references were losses in the research
5- All my correct found in attachment file

Recommendation: Revisions Required
