Reviewer B:

The following is my comments and critique:
Introduction

Some information needs to be added in the introduction
Please include some research on the use of glutathione and vitamin E, in some fish, especially regarding the optimum dosage.
Should be more explained how the mechanism of glutathione and vitamin E influences the reproductive system, especially the quality and quantity of seed production.
Check some of the vocabularies, and please use a common vocabulary in

fisheries

Material and Methods How to arrange treatment? Please, explain in more detail.

2. Some information needs to be added, to make it more clear.
Result and Discussion

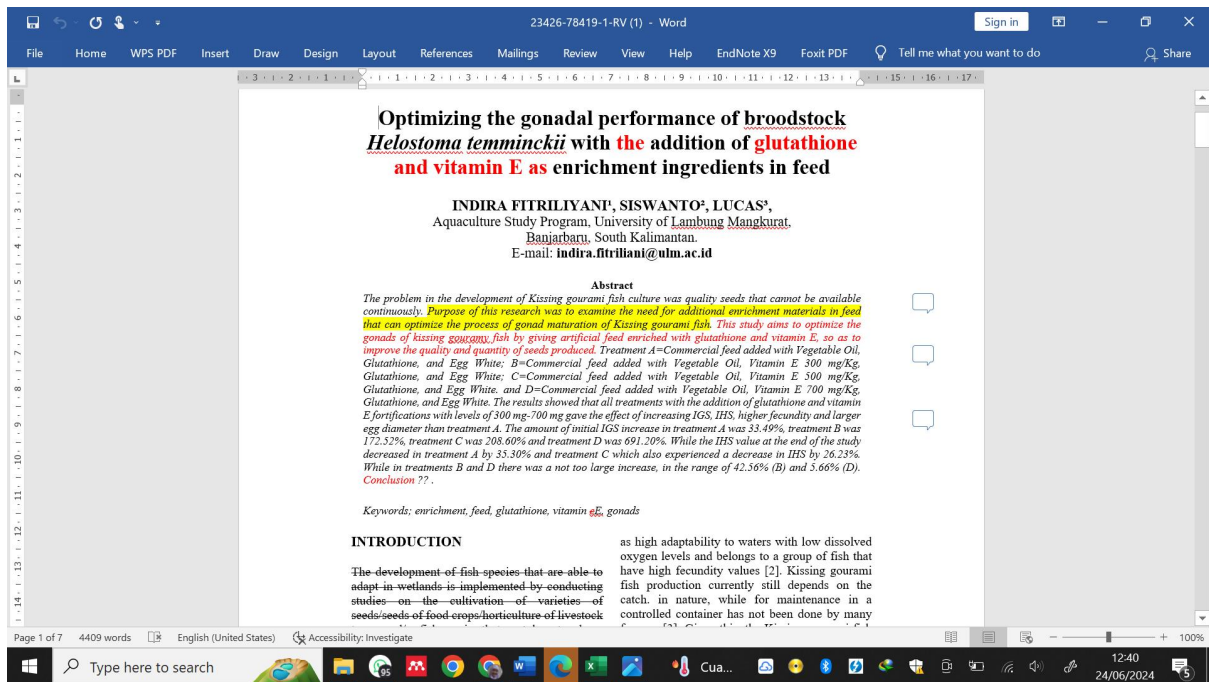

This explanation would increase the value of the discussion, please explain more detail:

Please check on calculations of fecundity, it might necessarily need to be reviewed.

Combine with literature, the effect of glutathione on fish, especially related to reproductive response.
